STACKED ENSEMBLE FORECAST MODEL
Stacked Ensemble (RF, XGB, CatBoost, LightGBM) + LightGBM Quantile
MODEL PERFORMANCE Point Forecast (Stack Meta) Test MAE: 0.288 kWh 90.0% PI Coverage: 97.5% Average Width: 4.207 kWh
pred_95 (Higher Quantile): 13.37 kWh
Means a 95% chance that the predicted will be below this value
Predicted (median): 12.78 kWh
True Value is 12.53 kWh Just 0.25 kWh difference
Point Prediction
pred_05 (Lower Quantile): 11.73 kWh
Basically means only a 5% chance to go below this value
